JOURNAL OF APPLIED ELECTROCHEMISTRY 18 (1988) 921–925

Indexes to Volume 18 (1988)

The subject index has been organized into topics for easy reference.

Subject Index

Corrosion

A kinetic study on the corrodability of anodic oxide films formed on molybdenum in NaOH solutions, 86
Ac corrosion of nickel in sulphate solutions, 831
Application of the accelerated Tafel plot technique to corrosion kinetics: role of double layer through simulation, 869
Behaviour of the corrosion potential and corrosion current of Cu–Ni alloys under erosion corrosion conditions. Effect of oxygen, 601
Corrosion inhibition study of a carbon steel in acidic media containing hydrogen sulphide and organic surfactants, 225
Corrosion of stainless steel (AISI 316) in molten sodium polysulphide under applied potential, 653
Corrosion par piqûres des alliages d'aluminium 5083–H321 et 6061–T651, 257
Electrochemical behaviour of copper in neutral aerated chloride solution. I. Steady-state investigation, 374
Electrochemical behaviour of copper in neutral aerated chloride solution. II. Impedance investigation, 384
Nature and stability of anodic oxide films formed on molybdenum in chloride solutions, 441
Polarization of lead–tin alloys in sulphuric acid, 142

Electrochemical analysis

Electrocatalytic methods for determination of organic impurities and cations of certain metals in natural, drinking and sewage water, 347

Electrochemical engineering

A consideration of circulating bed electrodes for the recovery of metal from dilute solutions, 504
Analysis of primary and secondary current distributions in a wedge-type aluminium-air cell, 499
Calculation of the current density distribution in an amalgam electrolyser by the finite element method, 96
Electrolytic recovery of copper from dilute solutions considering environmental measures, 288
Estimation of current efficiency in ion-exchange membrane chlor-alkali cells, 699
Experiments on copper recovery in a pulsed granular fixed bed electrode, 162
Influence de la pulsation liquide sur le comportement d'un réacteur electrochimique constitué par un lit de particules conductrices. I. Transfert de matiere, 394
Laminar radial flow electrochemical reactors. I. Flow fields, 768
Nine years of research and development on advanced water electrolysis. A review of the research programme of the Commission of European Communities, 1
Potential and current distributions along resistive electrodes, 469
Study of the effect of electrode resistance on current density distribution in cylindrical electrochemical reactors, 422
The electrochemical behaviour of a class of semicontinuous tank electrolysers, 104
The performance of porous and gauze electrodes in electrolysis with parabolic velocity distribution, 853

Electrochemical mass transfer

Enhanced mass transfer to a rotating cylinder electrode with axial flow, 710
Mass transfer to planar and expanded metal electrodes in bubble columns, 128
Natural convection mass transfer at conical surfaces, 196

Electrochemical thermodynamics

Applicability of four recent models to the discharge behaviour of different phases of MnO_2 in alkaline and acid/r..itral electrolytes, 62

Electrochromic phenomena

Electrochemical behaviour of viologen–cyclodextrin inclusion complexes. The case of non-alkyl group substituted viologen, 333
Electrochromic properties of polycrystalline thin films of tungsten trioxide prepared by chemical vapour deposition, 447
Heat treatment of amorphous electrochromic WO_3 thin films deposited onto indium–tin oxide, 715

Electrode kinetics, catalysis

Comparative voltammetric behaviour of the silver/silver oxide electrode prepared on vitreous carbon and silver substrates, 691
Competitive oxidation of formaldehyde and formate on amorphous copper-palladium-zirconium alloy electrodes in alkaline media, 183

Depolarization of the hydrogen evolution reaction on cadium electrodes in alkaline media, 633
Double channel electrodes and the measurement of heterogeneous reaction rates at the solid–liquid interface, 657
Electrocatalytic oxidation of glyoxalate in alkaline medium on platinum adatom electrodes, 43
Electrochemical behaviour of the Cr(II)/Cr(III) couple on silver, silver amalgam and silver-based mercury film electrodes, 417
Electrochemistry of anodic F_2 evolution at carbon electrodes: bubble adherence effects in the kinetics at rotating cone electrodes, 839
Electrooxidation of methanol on platinum bonded to the solid polymer electrolyte, Nafion, 577
Electroreduction of nitrate ions in concentrated sodium hydroxide solutions at lead, zinc, nickel and phthalocyanine-modified electrodes, 454
Evaluation of charge transfer resistance by geometrical extrapolation of the centre of semicircular impedance diagrams, 38
Evidence for anodization kinetics of molybdenum as a valve metal in buffer solutions of pH 9.3, 312
Films minces de Co_3O_4 et $NiCo_2O_4$ obtenus par nébulisation reactive (spray) pour l'électrocatalyse. I. Preparation et analyses physiques, 561
Films minces de Co_3O_4 et $NiCo_2O_4$ obtenus par nébulisation reactive (spray) pour l'électrocatalyse. II. Etude par voltampérométrie cyclique, 568
In situ activation of cobalt cathodes in alkaline water electrolysis, 815
Influence of oxide bond energies on the kinetics of chemical dissolution of anodic oxides on valve metals, 532
Kinetics of formic acid oxidation in advanced porous electrodes, 679
Mono- and multilayer formation studies on silver anodic film formation of silver bromide, 459
Nucleation and growth kinetics of Ag_7NO_{11} on a platinum single crystal electrode, 614
On the electrochemical behaviour of the anodic oxide film on tungsten in HCOOH and CH_3COOH solutions, 849
Oxidation of formic acid at a high surface area supported platinum modified by foreign metal adatoms, 240
Oxygen reduction on platinum in mixtures of phosphoric and trifluoromethane sulphonic acids, 763
Polymer-coated electrodes: cyclic voltammetry and chronoamperometry of non-ideal systems – the anodic oxidation of poly(4-vinyl-triphenylamine) films, 431
Study of electrooxidation of 1,3-propanediol on a gold electrode in basic medium, 538
The effect of temperature on the water electrolysis reactions on nickel and nickel-based codeposits, 894
The role of hydrous oxide in the electrochemical behaviour of platinum, 781
Valve metal behaviour of bismuth in NaOH, 555

Electrosynthesis

A reaction model for the electrochemical production of p-anisidine, 899
Catalytic effects of the silver ion on the indirect electrochemical oxidation of toluene to benzaldehyde using Ce^{3+}/Ce^{4+}, 298
Chlorination of toluene by two-phase electrolysis, 491
Electrochemical investigation of prostaglandin $F_{2\alpha}$ derivatives. I. Anodic iodination of prostaglandin $F_{2\alpha}$ and its methylesther, 205
Electrochemical oxidation of N-vinyl-thionaphthene-indole, 885
Electro-oxidation of sodium lauryl sulfate aqueous solutions, 904
Electrosynthesis of cobalt(III) ions in concentrated H_3PO_4 medium, 27
Indirect electrochemical epoxidation of hexene in a liquid–liquid electrolyte, 405
Mediated electrochemical reduction of dibromonorcarane in an emulsified system using Cr(II), 687
Nickel catalysed electrosynthesis of anti-inflammatory agents. Part I – Synthesis of aryl-2-propionic acids, under galvanostatic conditions, 109
Nickel catalysed electrosynthesis of anti-inflammatory agents. Part II – Monitoring of the electrolyses by HPLC analysis. Role of the catalyst, 116
Preparation and characterization of surface modified electrodes from hydroxyanthraquinones, 368
The electrochemical production of hydrogen using carbonaceous fuel as an anode depolarizer, 546

Energy conversion, batteries

A photoassisted rechargeable cell with a polymer modified p-InP semiconductor anode and a polypyrrole cathode, 619
A rechargeable battery of the type polyaniline/propylene carbonate – $LiClO_4$/Li–Al, 751
A rechargeable redox battery utilizing ruthenium complexes with non-aqueous organic electrolyte, 909
Characteristics of a poly(ethylene oxide)–$LiBF_4$ polymer electrolyte, 401
Contrôle de l'imprégnation électrochimique d'une électrode d'hydroxyde de nickel par relaxation de potentiel et mesure d'impédance, 368
Electrochemical characteristics and structural changes of molybdenum trioxide hydrates as cathode materials for lithium batteries, 857
Electrochemical solar cells with polypyrrole-coated CdSe sintered electrodes, 357
Fractional-factorial design of a porous-carbon fuel-cell electrode, 149
Free Lewis acid effects in electrolytes for Li/$SOCl_2$ cells, 211
Passive films on magnesium anodes in primary batteries, 268
Performance and impedance studies of thin, porous molybdenum and tungsten electrodes for the alkali metal thermoelectric converter, 417
Polyaniline: characterization as a cathode active material in rechargeable batteries in aqueous electrolytes, 92
Properties of surface layers formed on lithium in Li–$SOCl_2$ cells: synergetic effect of SO_2 and $LiAl(SO_3Cl)_4$, 625
Simulation of the tubular positive electrode of the lead–acid battery, 590
Solid electrolyte cells with a copper ion conductor $Rb_4Cu_{16}I_7Cl_{13}$. IV. Mixed-phase cathodes containing metal oxides, 705
Some effects of the addition of cobalt to the nickel hydroxide electrode, 215
Studies on the microstructure of the positive lead–acid battery plate and its electrochemical reactivity, 595
Zinc–manganese dioxide galvanic cell using zinc sulphate as electrolyte. Rechargeability of the cell, 521

Materials aspects of electrochemistry

Anodic oxidation of high modulus carbon fibres in sulphuric acid, 178
Electrochemical etch-stop control for silicon structures containing electronic components, 463

Evaluation of asbestos composite separators in advanced water test electrolysers, 280
Insoluble anode of α-lead dioxide coated on titanium for electrosynthesis of sodium perchlorate, 314

Metal deposition, surface finishing

A new bath for the electrodeposition of aluminium. III. The electrochemical behaviour of the rotating aluminium disc electrode in pure $AlCl_3$/THF-toluene solutions, 220
A simple and versatile rotating disc electrode design for use in studies of electroless plating, 666
Characterization of electrochemically formed thin layers of binary alloys by linear sweep voltammetry, 511
Crystal structure and morphology of electrodeposited zinc-iron binary alloys, 154
Electrochemical characterization of electrodeposited chromium and nickel-chromium layers on a steel substrate, 739
Electrochemical preparation of amorphous Fe–P alloys, 673
Electrodeposition of catalytically active nickel powders from electrolytes of various anodic compositions, 292
Electrodeposition of copper on Cu–Zr metallic glass substrates, 200
High-rate electrochemical copper deposition on bars, 339
Investigation of tellurium electrocrystallization by EHD impedance technique, 745
Stepwise decreasing current modes. I. Electrodeposition of metals from a bath with insoluble anode and limited volume of solution, 807
The electrodeposition of chromium from chromium(III) solutions – a study using microelectrodes, 644
The electrodeposition of gallium from synthetic Bayer-process liquors, 134

Mineral electrochemistry, hydrometallurgy

A voltammetric study of galena immersed in acetate solution at pH 4.6, 323
Effect of sodium and potassium sulphates on zinc electrowinning, 32
Effects of certain impurities on zinc electrowinning in high-purity synthetic solutions, 583
Electrochemical behaviour of pyrite in sulfuric acid solutions containing silver ions, 484
Experimental determination of the factors affecting zinc electrowinning efficiency, 120
L'électrodissolution d'une poudre de galène en milieu d'acétate d'ammonium et d'acide chlorohydrique, 304
The effect of thiourea on zinc electrowinning from industrial acid sulphate electrolyte, 252
The effects of metallic impurities and 2-butyne-1,4-diol on zinc electrowinning from chloride solutions, 54

Molten salt systems

Aluminium dissolution in $NaF–AlF_3–Al_2O_3$ systems, 731
Current efficiency in aluminium reduction cells, 473
Effect of anode–cathode distance on the cell potential and electrical bath resistivity in an aluminium electrolysis cell with a sloping TiB_2 composite cathode, 863
Electrochemical determination of current efficiency for aluminium deposition on solid substances from cryolitic melts, 639
Electrochemical studies of titanium in fluoride–chloride molten salts, 80
Electrochemical study of catalytic oxidation of naphthalene in molten sulphate pyrosulphate at 425°C with vanadium pentoxide, 876
Electrolytic production of silicon, 15
Etude de la reaction d'oxydo-réduction de l'aluminium dans des bains de chlorures alcalins fondus, 23
Influence of the substrate on the rate of aluminium loss in molten salt systems, 75
The electrodeposition of improved molybdenum coatings from molten salts by the use of electrolyte additives, 823

Solid state

An experimental technique employing a high-temperature gas-tight alumina seal for the assessment of the electrical properties of solid electrolytes, 724
Influence of H_2O, CO_2 and various combustible gases on the characteristics of a limiting current-type oxygen sensor, 757
Interpretation of the output signal from a zirconia oxygen sensor operating under applied current, 188
Mixed conduction and oxygen permeation in the substituted oxides for $CaTiO_3$, 173
Nernstian behaviour of zirconia oxygen sensors incorporating composite electrodes, 232
Oxygen ion conductivity of the ceria–samarium oxide system with fluorite structure, 527
Response rate techniques for zirconia-based Nernstian oxygen sensors, 608
Use of the Nasicon/Na_2SO_4 couple in a solid state sensor for SO_x ($x = 2, 3$), 245
